[If consider an infinite space]

Reference to...

Before Location - Attributes = 0

'0' is area of ∞×∞, a possible 3-Dimensional area, where multiverse can exist. Hence too, that, multiverse exist everywhere in a little compact space, might be true

$$\frac{0}{0} = \infty \quad \Delta = \infty \quad \Delta \neq \infty$$

$$\Delta = 1, \quad 1/0 = \infty$$

$$0^0 = x \quad \infty \times 0 \quad \Bigg] \text{First produced values}$$

$$0 \log 0 = x \quad \infty - \infty$$

$$0 \times \infty = x \quad \infty/\infty$$

Properitired that god can (ii) Combining 'infinity' to zero be dual ∞ = ∞ + ∞, and (iii) Trying to divide in parts can ressolve itself to

Along with values. (iii) Simultaneous Fragmentation noting again by ∞×∞ = 0
properitics too both (ii) Explained by S-P

'∞' still here, Any value having ∞ -1 -i -1 -i -1 -i - ∞ that god always
properties of 0, ∞, which can's showed that only way shows
be broken again by individual, but is god, which is only dual
0, ∞ [creating a system, where accessible by removing nature
the net energy is 0, ∞ '0' by x/0. Infinite 2N
located 'something to destroy, every Values can never become dimensional
value', but the only way to god, but can still move space has
access it, is only by using (-) toward infinity by a volume
Defined (-) as a wrong way, which themselves (3x+x) of zero,
may lead to destruction, for negative showed that, by whole multiversal infinite
(t) signified a way to move forward system is just 0

Properties of god explained mathematically :-
Considering ∞ as god, while '0' is also a form of god as they both share identical properties

(i)
$$\frac{\infty}{\infty} = \frac{0}{0}$$;

(ii) $\infty \times \infty = 0$ says that, god can dissolve himself into zero again by first dividing himself into two infinite parts, and merging properties.

$$\infty = \infty + \infty$$

$$0 = \infty \times \infty \quad \left(\begin{array}{l} \text{So, its logical to consider 0 as some} \\ \text{form of god, capable of creating} \\ \text{finites by 0/0} \end{array} \right)$$

(iii) God lies in everyone, $0 \times \infty = \Delta$ (where Δ is everything finite except 0 and infinity), but as we cant divide ∞ or 0 belues back into god, until god decides to divide.

as, $$\frac{\Delta}{0} = \infty, \quad \frac{\Delta}{\infty} = 0$$

(viii) By Supe
prope

(iv) has
infin
proof

(v)

So,
max

(iii) By Supervariable theorem, if god is infinite, he can never possess the same property, as finite beings doo.

$f(x)$ ---→ $f(x)$ being constant forms a straight line, parallel to the x-axis, on infinity, it most reach a (supervariable, having all possible number simultaneously, instead $f(x)$).
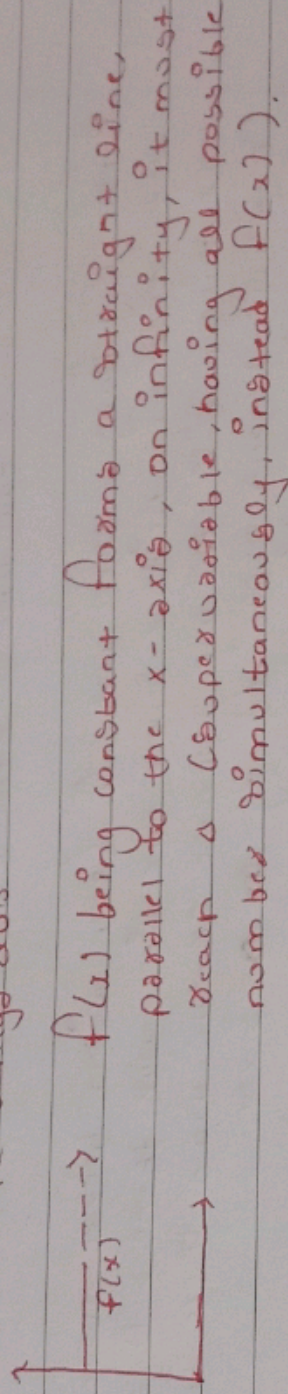

(iv) God is infinite, still it doesn't mean that he most necessarily occupy a infinite space, even in his physical forms.

Proof =) Given, god is infinite, can fit into any nth dimensional closed shape, having infinite dimensions. So the volume or Hypervolume can be bound by,

$$\int_0^\infty, \text{if he is in a}(2n-1) \text{ dimension } \left(\text{we can assume a anything,} \atop \text{instead of } (0, \infty) \right)$$

$$\int 0, \text{if he is in a 2n dimension}$$

So, well he doesn't needs any infinite physical space, instead he can morph into any shape of any physical dimensions.

— A—final — Overview —

Visualizing the proto-universe mathematically

* How does it started?

Before Big Bang, there was 0 (even before quantum Perturbations were there), niither space nor time was there. 0 Symbolized everything. Still the one supreme creator was there in the nothing.

Symbolised and explained by $0 = \infty \times \infty$

0 contains infinity already.

$$0^0 = 0 \times \infty \;,\; 0 = \infty \times \infty \;,\; 0/0 = \infty$$

$c_1 = \infty$

$c_3 =$

$T = \frac{c_3}{}$

$T = \frac{\infty}{}$

God was there, who combined with 0, even after knowing that, he alone can do anything by $(\infty - \infty = \Delta)$. God's engagement with 0, was necessary, as $\infty - \infty$, ∞/∞ and other equations to create Δ (anything) will occur simultaneously with $0 \times \infty$. Hence that nothingness was necessary, We can't trace how much time does all this took, as there was nothing each as time.

Still we can try a way, to know, how much time are this took.

A generalised time formula is here, which tells the time taken between two events e_1 and e_2 dependent on capability (c).

$$T = \frac{e_2 - e_1}{c}$$

There was ∞ infinity and to trace, how much time he took in creating lives (Δ) can be fetched by

$e_1 = \infty$ (only infinity was there)

$e_2 = \Delta$ (finite life) $= \infty/\infty = 0/0$

$$T = \frac{\infty/\infty - \infty}{c}, \quad as \quad \infty/\infty = 0 \quad and \quad it \ can't \ be \ \infty, \Delta \neq \infty$$

$$so \quad \infty \quad \frac{\Delta - \infty}{\infty} = \Delta, \quad He \ simultaneously \ took \ "no \ time" \ and \ "infinite \ time" \ to \ create \ life.$$

This was what we expected, because, there was nothing but, as time, the time, then was ∞ Δ, which can be achieved only if someone travels infinite distance in infinite speed, as

$$Speed = \frac{Distance}{Time}, \quad Time = \frac{Distance}{Speed} = \frac{\infty}{\infty} = \Delta$$

The creation of universe can be symbolised by equation in this way

The equations show processes successively.

$$0^0 = \log_0 \times 0 = 0 \times \infty, \quad \infty = 0 \times 0,$$

$$0/0 = \infty$$

$$\left.\begin{array}{l} \infty \times 0 \\ \infty - \infty \\ \infty/\infty \\ 0/0 \\ 0^0 \end{array}\right\} = \Delta \quad \Longleftarrow \text{Life Creating Equations}$$
